

The Alliance for Aviation Across America, and organizations and local leaders from around the country invite you to a panel discussion on the future of aviation. In spite of challenges posed by the global pandemic over the last year, the general aviation industry has made impressive investments in sustainable fuel and technologies. These developments, along with advancements in new and emerging technologies, all represent important areas of growth at a critical time when recovery and mobility remain more important than ever.

During the event, participants will discuss how the industry's commitments support general aviation and our network of airports, our future workforce, as well as reduced congestion and environmental impact, jobs, and access to critical services for communities around the nation. Panelists will also discuss how federal investment and support are needed to spur and incentivize further growth for the sector.

When

The panel discussion is scheduled for Thursday, June 10 at 3 PM Eastern, 12 PM Pacific.

Who

Panelists will include:

- Sam Mintz, Transportation Reporter for Politico (Moderator)
- Kansas Secretary of Transportation Julie Lorenz
- The Honorable Barbara Tolbert, Mayor of Arlington, WA
- Commissioner Bill Holen, Arapahoe County Colorado, National Association of Counties (NACo)
- Michael Alaimo, Director, Environmental and Energy Affairs, Michigan Chamber of Commerce
- Niel Ritchie, Senior Advisor, Main Street Project, Board Member, Alliance for Aviation Across America

Register

The event will be hosted on Zoom. To register, click [here](#).

General aviation sustains 1.2 million jobs, \$247 billion in economic impact annually, and access for communities to critical services such as fire-fighting, law enforcement, emergency medical response, search and rescue, natural disaster relief, powerline maintenance, and pipeline inspection, along with many others. More information can be found [here](#). The sustainable aviation fuel market size is projected to grow from an estimated \$66 million in 2020 to \$15.3 billion by 2030, according to [Research and Markets](#). By 2035, the AAM market in the United States is expected to reach \$115 billion per year and support more than 280,000 high-paying jobs, according to a study by [Deloitte](#).
